Cloud & Devops

Introduction for business actors

Damien Ribeiro

February 24, 2020

Outline

- Devops
- 2 Microservices
- Cloud

Definition

"A set of practices intended to reduce the time between committing a change to a system and the change being placed into normal production, while ensuring high quality."

[Len Bass, Ingo Weber, and Liming Zhu from the CSIRO and the Software Engineering Institute]

Definition

A set of practices to reconcile Dev and Ops.

Definition

An extension of Agility to include Ops

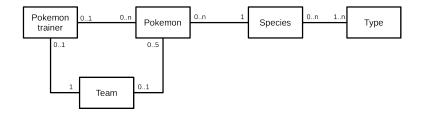

Objectives

- Increase release rate
- Decrease Time to Market
- Decrease production delivery's failures
- Decrease failure effects

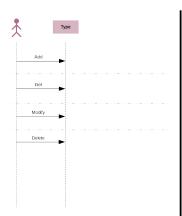

Practices

- Communicate & share information
- Be responsible & autonomous
- Test & ensure product quality
- Done it, Run it
- Automation
- Non-event

Better an example than a definition.

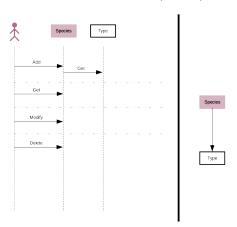

Manage a pokemon type

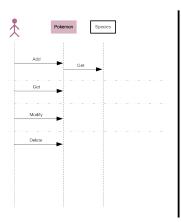

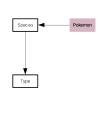

Add a pokemon species

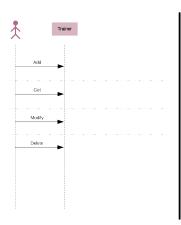

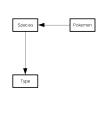

Add a pokemon

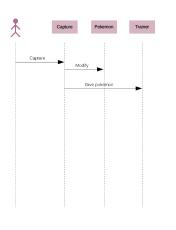

Add a pokemon trainer

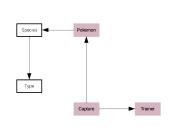

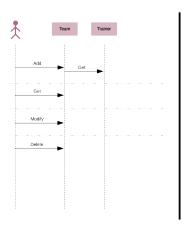

Trainer

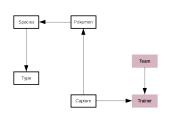

Capture a pokemon

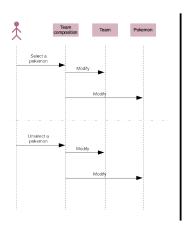

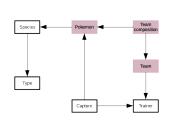

Manage a pokemon team

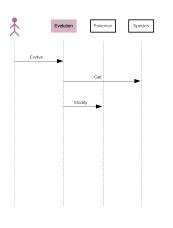

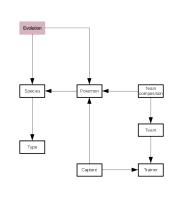

Manage a pokemon team composition

Make a pokemon evolve

Requirements

- User stories aligned with components
- Minimize the number of components impacted
- Minimize the scope of each user story

Cloud definition
Container & scheduling
Requirements & acceptance tests

Cloud defintion

Cloud defintion

Definition

- On-demand availability of computer system resources
- Coherence
- Economies of scale

Cloud defintion

Definition

- On-demand availability of computer system resources
- Coherence
- Economies of scale

Some features

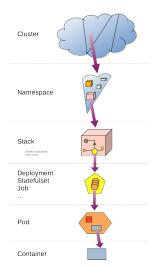

- Device and location independence
- Flexibility
- Scalability
- Reliability

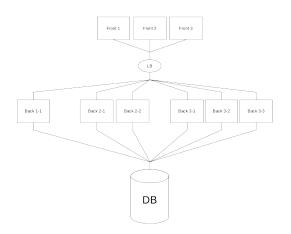

What is a container?

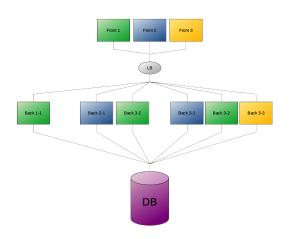

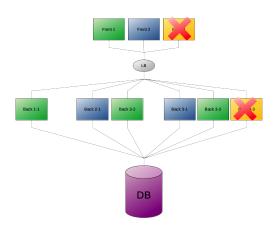

A cluster architecture

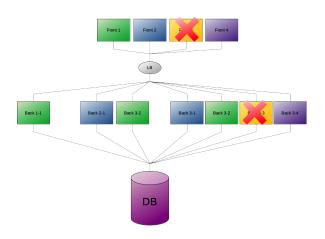

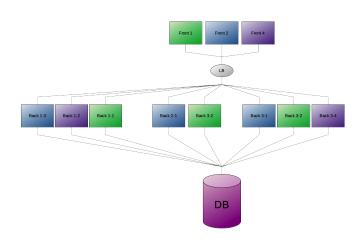

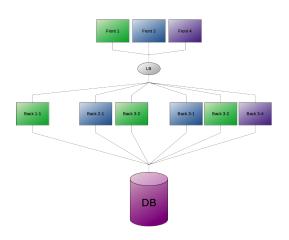

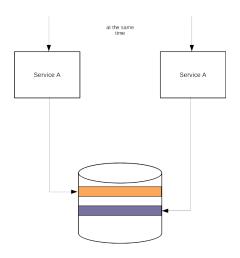

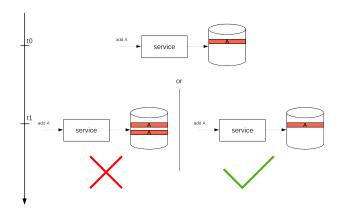

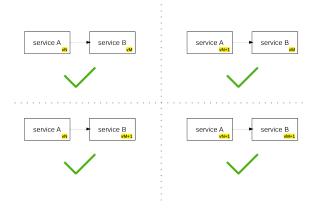

Idempotence

Backward compatibility

Design for failure

Anything that can go wrong will go wrong. [Murphy's law]

Design for failure

Anything that can go wrong will go wrong. [Murphy's law]

Be prepared!
